Global Dimension - Gratitude - KS2/KS3

"Thinking about what we are grateful for helps us to stay positive and to remember which things are the most important to us. Taking time to appreciate the things which are good in our lives also helps us remember why it is important to protect and nurture these things, through what we say and do, so they can be enjoyed by others."

An activity in reflection and empathy, children are given profiles of various people, and asked to think about how their lives are different, but also how they are similar. A good assembly or PSHE activity.

World Water Day March 22nd- KS2/KS3

This day, declared by the UN General Assembly, aims to promote awareness of the extent to which water resource development contributes to economic productivity and social well being. The focus for World Water Day is water and climate change, exploring how the two are inextricably linked. The aims of this activity is for learners to understand how vital water is (beyond drinking), the importance of water conservation and identifying causes of pollution.

Into Film - Filmmaking for Primary Literacy - Professional Development

"Whether you're a new or experienced filmmaker, we'll help broaden your range of classroom strategies and transform pupils' engagement in literacy. Celebrate pupils' unique voices and put them at the centre of their own learning. "

A valuable training opportunity for educators from Into Film. Filmmaking for Primary Literacy is an accessible and free online course for teachers keen to use filmmaking with their students. This course can be completed at your own pace and could be an excellent way to engage students who may otherwise struggle with literacy.
